SKILLS

Front-End:

- React
- Redux
- JavaScript - ES6
- TypeScript
- Fetch API & Axios
- HTML5
- CSS3/SCSS
- Bootstrap
- Styled Components

Back-End:

- Node.js
- Express
- MongoDB
- Socket-IO
- Passport & Oauth
- Bcrypt

Misc:

- Git
- Jest & React Testing Library
- CircleCI
- OOP
- Data Structures & Algorithms
- Postman
- Python

LANGUAGES

Hebrew - Native

English - Fluent

PROJECTS

Get Jokes

A MERN Stack project that generates jokes according to the user's queries. Using Sessions and MongoDB to allow users to create free accounts and save the jokes they liked in a personal collection

Includes Unit Tests And CI/CD

React, Javascript-ES6, Redux, Router, Axios, Bootstrap, CSS, Node.js, Express, MongoDB, Passport, Oauth2.0, Bcrypt.

Chat App

Cross-platform chat application. Users can create or join live rooms, and chat with their friends online!

React, Javascript-ES6, Router, React-Emoji, CSS, Node.js, Socket-IO.

IP Address Tracker

A tracking app that locates users by their IP address.
Can locate any valid IPv4 address on the globe!

React, TypeScript, Fetch, ipify API, IP Geolocation API, Leaflet-Map

EDUCATION

Full Stack Development

Udemy Courses, Campus-IL, Self-Made Projects

Learned how to build, test, deploy and maintain web applications, while focusing on the "MERN" stack.
Also studied core computer-science concepts, like object-oriented programming, and data structures & algorithms.

Practical Engineering In Electronics | 2017-2019

Kziney-Yam College, Acre.

Experienced with low-level programming languages, including C, Assembly, and VHDL.

MILITARY EXPERIENCE

Monitor And Control Systems Technician | Israeli Navy | 2019-2022

Experienced with locating and solving complex problems in large-scale systems, while working on tight schedules.
