

## SUMMARY

Full-stack developer specializing in the MERN stack. With a practical engineering degree in electronics, and a great passion for technology and innovation.

Enjoys building projects, and finding new documentations to explore!

## CONTACT

+972-544-718-317

## SKILLS

### Front-End:

- React
- Redux
- JavaScript - ES6
- TypeScript
- Fetch API & Axios
- Bootstrap
- HTML
- CSS

### Back-End:

- Node.js
- Express
- MongoDB
- Socket-IO
- Passport & Oauth
- Bcrypt

### Misc:

- Git
- Jest & React Testing Library
- CircleCI
- Object-Oriented Programming
- Data Structures & Algorithms
- Postman
- Python

## LANGUAGES

Hebrew - Native  
English - Fluent

# Yaniv Weinshtein

## FULL STACK DEVELOPER

## PROJECTS

### Get Jokes - Full Stack Web Application

A MERN Stack joke generator that calls the **Joke-API** using queries that are set by the user. Full support for sessions and **user authentication + Oauth2.0**. Users can create free accounts and store the jokes they like in their private collections, using **MongoDB** and the **REST-API** on the backend.

**Includes Unit Tests And CI/CD**

**React, Javascript-ES6, Redux, Router, Axios, Bootstrap, CSS, Node.js, Express, MongoDB, Passport, Oauth2.0, Bcrypt.**

### Chat App - React & Socket-IO

Cross-platform chat Application. Users can join or create live rooms, and chat with their friends online! It supports all the classic emojis, and auto-notifies when users join/leave the room.

**React, Javascript-ES6, Router, React-Emoji, CSS, Node.js, Socket-IO.**

### IP Address Tracker

A tracking app that locates users by their IP address. Can locate any given valid IPv4 address on the globe!

**Using 3 different APIs** - to find the local IP (optional), track its location, and display it on a live map!

**React, TypeScript, Leaflet-Map, ipify API, IP Geolocation API**

## EDUCATION

### Full Stack Development

Udemy Courses, Campus-IL, Self-Made Projects

Learned how to build, deploy and maintain web applications, while focusing on the "MERN" stack. Also studied core computer-science concepts, like object-oriented programming, and data structures & algorithms.

### Practical Engineering In Electronics | 2017-2019

Kziney-Yam College, Acre.

Experienced with low-level programming languages, including C, Assembly, and VHDL.

## MILITARY EXPERIENCE

### Monitor And Control Systems Technician | Israeli Navy | 2019-2022

Experienced with locating and solving complex problems in large-scale systems, while working on tight schedules.
