## Summary

Full-stack developer specializing in the MERN stack. With a practical engineering degree in electronics, and a great passion for technology and innovation. Enjoys building web applications, with a tendency towards the front-end, and finding new documentations to explore!

### I'm experienced with the following libraries and technologies:

**Front-End:** JavaScript, TypeScript, ReactJS, Redux, Context, React-Query, Axios, Formik, Styled components, Bootstrap, SCSS, CSS, HTML

**Back-End:** Node.js, Express, MongoDB, Socket-IO, Passport.js, OAuth2.0, Bcrypt

**Misc:** Jest, Es-Lint, Git, Linux, Circle-CI, Postman, Python

## Work experience

### Oct 2022 - Present: eBigay | Front-End Developer

I'm part of the frontend team for a marketplace web app that connects donors with those in need, giving unused items a second chance. Our role is to bring the designs to life by creating a user-friendly interface and integrating with the server API. In this role, I have been introduced to new technologies and gained experience working in a team, and working with the SCRUM methodology.

-Team's stack includes: React, TypeScript, Context, React Query, Formik, Router, Styled-Components, MUI, Vite
