## SKILLS

### Front-End:

- React
- Redux
- Javascript - ES6
- Typescript
- Axios & HTTP Requests
- Bootstrap
- HTML
- CSS

### Back-End:

- Node
- Express
- MongoDB
- Socket-IO
- Passport & Oauth
- Bcrypt

### Misc:

- Git
- Postman
- Python
- Jest & React Testing Library

## LANGUAGES

Hebrew - Native  
English - Fluent

# Yaniv Weinshtein

## FULL STACK DEVELOPER

## PROJECTS

### Get Jokes - Full Stack Web Application

A joke generator that calls the Joke-API using queries that are set by the user. Full support for sessions and user authentication + Oauth2.0. Users can create free accounts and store the jokes they liked in their private collections. Also features a custom dark theme. The theme preference gets saved in the user's local storage for the next time they visit. Fully responsive and compatible with mobile devices.

\* includes Unit Tests

Built Using: React, Javascript-ES6, Redux, Router, Axios, Bootstrap, CSS, Node.js, Express, MongoDB, Passport, Oauth2.0, Bcrypt

### Chat App - React & Socket-IO

Cross-platform chat Application, responsive and well suited for both desktop and mobile. Users can join or create live rooms, and chat with their friends online! It supports all the classic emojis, and auto notifies when users join/leave the room.

Built Using: React, Javascript-ES6, Router, React-Emoji, CSS, Node.js, Socket-IO

## EDUCATION

### Full Stack Development

Udemy Courses, Campus-IL, Self-Made Projects

Learned how to build web applications while focusing on the "MERN" stack. Also studied core computer science concepts, like object-oriented programming in Python, and data structures & algorithms.

### Practical Engineering In Electronics | 2017-2019

Kziney-Yam College, Acre.

Experienced with low-level programming languages, including C and Assembly.

## MILITARY EXPERIENCE

### Monitor And Control Systems Technician | Israeli Navy | 2019-2022

Experienced with locating and solving complex problems in large-scale systems, while working on tight schedules.
