Yaniv-Weinshtein

Full-stack developer with **1.5 years of professional experience** building web applications using React and Node.js. With a practical engineering degree in electronics, and a great passion for technology and innovation.

Experienced with the following languages, libraries and technologies:

Front-End:

JavaScript, TypeScript, React, Next.js, Redux, Context, React-Query, Axios, Formik, I18Next, Styled components, Material-UI, SCSS, CSS, HTML

Back-End:

Node.js, Express, MongoDB, Socket-IO, JWT, Passport.js, Oauth2.0 Swagger, Nodemailer

Misc

Es-Lint, Git, Github-Actions, Jest, Jira, SalesForce, Monday, Make, Zapier, Postman, Linux

Work experience

Dec 2023 - Present: **CRM Developer | Productive**
Salesforce, Monday, Make, Zapier, Automation, Integrations, Postman, Jira
Building custom CRM systems tailored to diverse clients, ranging from small businesses to large companies. Utilizing platforms such as Salesforce and Monday.com for CRM functionalities, alongside Make (Integromat) for automation and API integrations. Leading the development process from the initial characterization stage through to production, and working in an agile environment.

Oct 2023 - Mar 2024: **Front End Developer | Fluffy Finder | Volunteering** **(Link)**
React,TypeScript, Context, Material-UI, Auth0, SWR, PWA
Joining the frontend team to continue a Work-In-Progress centralized system for reporting lost/found pets that use AI and algorithms to match between reports. Improving and refactoring the existing user interface, adding new features, integrating with the backend API and analytics providers, working alongside other development teams, designers, QA and a product manager.

Feb 2023 - Sep 2023: **Full Stack Developer | Socialo** **(Link)**
React, Node.js, MongoDB, Oauth,TypeScript, Context, React-Query, Formik, Styled-Components, Material-UI, I18N

Building an AI-based B2B SaaS digital-marketing platform for businesses and marketing agencies. Leading product development from planning to production. Working end-to-end, writing clean, reusable, and type-safe code, managing integrations (AI models, Social networks, Analytics, etc.), building CI/CD pipelines, working with SCRUM methodology.

Oct 2022 - Jan 2023: **Front-End Developer | eBigay | Volunteering** **(Link)**
React, TypeScript, PWA, Context, React-Query, Formik, Styled-Components, Material-UI
Working in the frontend team for a marketplace web app that connects donors with those in need. Developing responsive and user-friendly UI from scratch, according to the given design in Figma. Consuming the server API and collaborating with the back-end team. Working with SCRUM methodology.

Projects

- Similarity API: **Next.js, TypeScript, Next-Auth, Prisma, Open-AI, Redis, TailwindCSS**

A Full-Stack Next.js project, containing a rate-limited API in the back-end and a user dashboard with documentation in the front-end. The API receives 2 pieces of text, converts them to vectors, and returns a number between 0-1 representing the similarity of the 2 vectors.

Project   GitHub Repository

- IP Address Tracker: **React, TypeScript, Ipify-API, IP-Geolocation-API, Leaflet-Map**

A tracking app that locates users by their IP address. Can locate any valid IPv4 address on the globe!
