SKILLS

Front-End:
- React
- Redux
- JavaScript - ES6
- TypeScript
- Axios & HTTP
- Bootstrap
- HTML
- CSS

Back-End:
- Node.js
- Express
- MongoDB
- Socket-IO
- Passport & Oauth
- Bcrypt

Misc:
- Git
- Jest & React Testing Library
- CircleCI
- Object-Oriented Programming
- Data Structures & Algorithms
- Postman
- Python

LANGUAGES

Hebrew - Native

English - Fluent

EXPERIENCE

Get Jokes - Full Stack Web Application

A MERN Stack joke generator that calls the Joke-API using queries that are set by the user. Full support for sessions and user authentication + Oauth2.0. Users can create free accounts and store the jokes they liked in their private collections.
Also features a custom dark theme! The theme preference gets saved in the user's local storage for the next time they visit.
Fully responsive and compatible with mobile devices.

* Includes Unit Tests And CI/CD

Built Using: React, Javascript-ES6, Redux, Router, Axios, Bootstrap, CSS, Node.js, Express, MongoDB, Passport, Oauth2.0, Bcrypt.

Chat App - React & Socket-IO

Cross-platform chat Application, responsive and well suited for both desktop and mobile. Users can join or create live rooms, and chat with their friends online! It supports all the classic emojis, and auto-notifies when users join/leave the room.

Built Using: React, Javascript-ES6, Router, React-Emoji, CSS, Node.js, Socket-IO.

EDUCATION

Full Stack Development
Udemy Courses, Campus-IL, Self-Made Projects

Learned how to build, deploy and maintain web applications, while focusing on the "MERN" stack. Also studied core computer-science concepts, like object-oriented programming, and data structures & algorithms.

Practical Engineering In Electronics | 2017-2019
Kziney-Yam College, Acre.

Experienced with low-level programming languages, including C, Assembly, and VHDL.

MILITARY EXPERIENCE

Monitor And Control Systems Technician | Israeli Navy | 2019-2022

Experienced with locating and solving complex problems in large-scale systems, while working on tight schedules.
